Digit the Badger 2

Have a go at some of the puzzles that Digit the Badger has sett (get it?) for you.

Dave and Sam decided to go to the hide to watch the badgers. They took with them some peanuts and raisins to put down, to give the badgers a treat, and persuade them to hang around for a while, so that the children could have a really good look at them.

Peanuts cost 80p for 100g. What would Dave need to pay for 350grams?

....

Raisins cost 90p for 100g. Sam paid £2.70 for a bag. How many grams of raisins did she get?

....
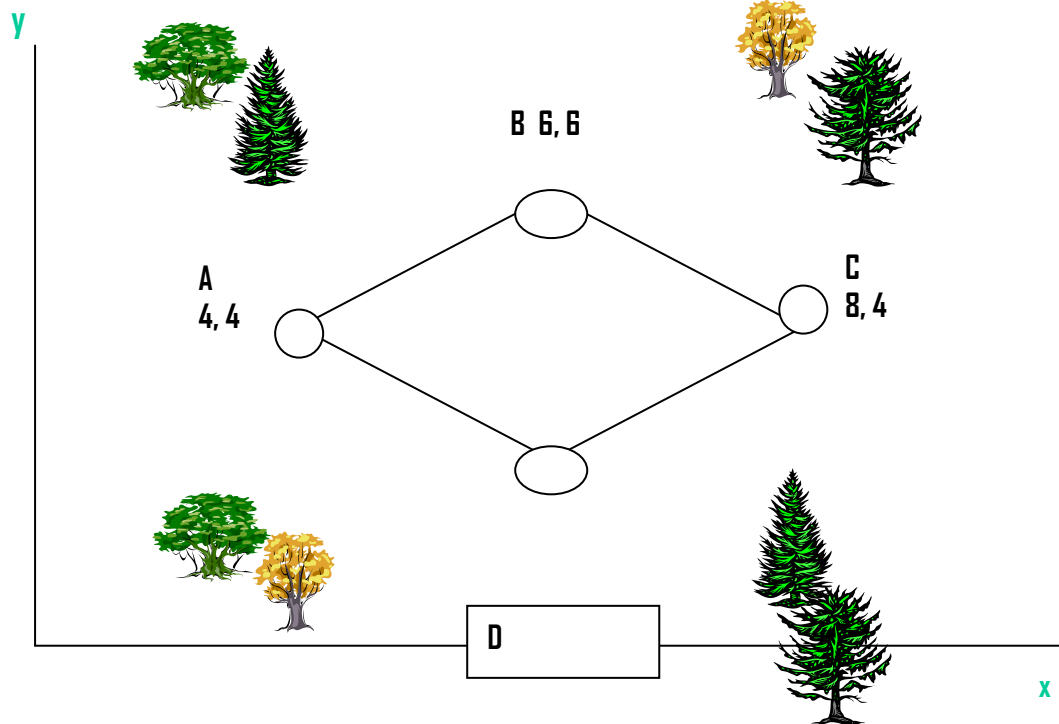

The gang from the Badger Group decided to do a sponsored walk to raise money for the group.
Here are the start and finish times of the gang. How long did each member take?

	Start	Finish
Sandy	10.30am	11.50am
Sarah	10.35am	12.10pm
Steph	10.40am	12.09pm
Fiona	10.45am	12.02pm

Sandy …………… Sarah ………….. Steph …………. Fiona ……………

How much longer did Sandy take than Fiona? ……………………………………………………………

The Badger Group members were surveying a new sett they'd been told about. (If you find a sett, please let us know. We don't mind if we already know it.)
They plotted the coordinates.

y

B 6, 6

A
4, 4

C
8, 4

D

x

D
What is the coordinate of entrance D? …………………
